(f) Taxes on Income

Current tax is determined as the amount of tax payable in respect of taxable income for the year in accordance with the Income Act, 1961.

The deferred tax for timing difference between the book and tax profits for the year is accounted for, using the tax rates and laws that have been substantively enacted as of the Balance Sheet date. Deferred tax assets arising from timing differences are recognized to the extent there is reasonable certainty that this would be realized in future.

(g) Impairment of Fixed Assets

Consideration is given at each balance sheet date to determine whether there is any indication of impairment of the carrying amount of the Company's fixed assets. If any indication exists, an assets recoverable amount is estimated. An impairment loss is recognized whenever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is

greater of the net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value based on an appropriate discount factor.

(h) Contingent Liabilities

The Company creates a provision when there is a present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation.

A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require outflow of resources. When there is a possible obligation or present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

(i) Miscellaneous Expenditure

Preliminary Expenses and Share Issue Expenses are charged to the Profit & Loss Account in the year in which they are incurred.
